- 12. Public Reference Tables

01 / KOANTUM

Executive Summary

KOANTUM is a Base-network meme project built around Dr Koantstein, a fictional “quantum scientist” whose character, satire and community remixability form the project’s cultural layer.

KOANT has a fixed total supply of 404,690,000,000 tokens. Supply allocation is 86.2% Genesis Liquidity, 6.9% Community Reserve, 3.9% TeamVault, and 1.5% to each of two founder wallets.

Liquidity is secured through a dedicated LPLocker. LP tokens remain locked until 6 September 2069 at 00:00 UTC. After the unlock condition, the beneficiary is the Genesis Safe.

The KOANT contract, KOANT Operations, Treasury, founder wallets, TeamVault and LPLocker are public project addresses. Private keys, seed phrases and sensitive security information are never public.

Core token rules are finite and explicit: fixed supply, no post-deployment public mint function, no blacklist or freeze mechanism, no proxy or upgrade path, one-way trading enablement, fixed max-buy/max-wallet rules, and launch-state tax transitions that end at zero.

Whitepaper principle
Culture can be absurd. On-chain numbers cannot. Token mechanics, public addresses and lock dates should be independently checked against official project sources and Base records.

02 / KOANTUM

KOANTUM, Dr Koantstein & Internet Culture

Every meme gets an era. This one gets a lab.

Dr Koantstein (“Dr K”) is the narrative face of KOANTUM: a fictional, self-certified quantum scientist used for satire, recurring jokes, interactive answers, visual memes and community-created remixes. Dr K is not presented as a financial expert, and character dialogue is not investment guidance.

KOANTUM treats the internet itself as part of the creative medium. The cultural layer can improvise, while the smart-contract layer remains deterministic and auditable.

KOANTUM has three related identities: Dr Koantstein is the character; KOANT is the token; KOANTUM is the project and community. The KOANT token mark and its turquoise color system provide a consistent visual identity across official materials.

Cultural statement
THE CHARACTER IS THE SIGNAL · THE INTERNET BUILDS THE MYTH · CULTURE BEFORE CORPORATE BEIGE

03 / KOANTUM

Network & Token Overview

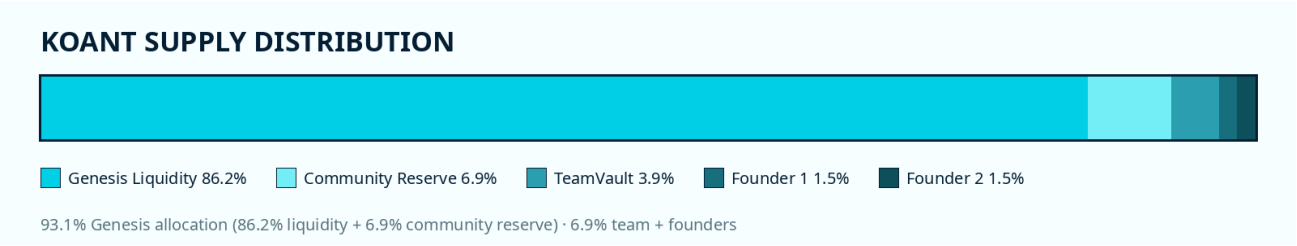

Parameter	Value
Network	Base Mainnet
Chain ID	8453
Token name	KOANTUM
Ticker	KOANT
Decimals	18
Total supply	404,690,000,000 KOANT — fixed
DEX infrastructure	Uniswap V2 on Base
Public token contract	0x9DC38f75a3dC03726F5b0a8C401954FCFAA7853c

Explorer: KOANT on BaseScan

04 / KOANTUM

Supply & Allocation

The fixed KOANT supply is fully allocated at 100%.

Allocation	Share	Amount	Role
Genesis Liquidity	86.2%	348,842,780,000 KOANT	Liquidity allocation
Community Reserve	6.9%	27,923,610,000 KOANT	Community allocation; separate from Genesis LP
TeamVault	3.9%	15,782,910,000 KOANT	Time-locked team allocation
Founder Wallet 1	1.5%	6,070,350,000 KOANT	Founder allocation
Founder Wallet 2	1.5%	6,070,350,000 KOANT	Founder allocation

Genesis Safe initial allocation
93.1% of total KOANT is initially assigned to the Genesis Safe: 86.2% for Genesis Liquidity and 6.9% for the Community Reserve. The Community Reserve is separate from the LP amount.

05 / KOANTUM

Liquidity Architecture

KOANTUM uses a long-term locked-liquidity structure.

Genesis Liquidity is 348,842,780,000 KOANT, equal to 86.2% of the fixed supply. The paired external asset is WETH on Base through Uniswap V2 infrastructure.

LP tokens are held by the LPLocker contract. The unlock timestamp is 2069-09-06 00:00:00 UTC, with the Genesis Safe as beneficiary after unlock.

Liquidity rule	Value
LP token holder	LPLocker contract
Public LPLocker	0x5d9152a4F5B134cdd666253D443d259cdecA125c
Unlock	2069-09-06 00:00:00 UTC
Beneficiary after unlock	Genesis Safe
Genesis Liquidity	348,842,780,000 KOANT (86.2%)
Liquidity status	Locked until the stated unlock time

06 / KOANTUM

Team & Founder Structure

Public role	Address	Purpose
Treasury	0x5002fd19637109973AaFB5E72603217319C5338c	Official Treasury; fixed TeamVault beneficiary.
KOANT Operations	0xf1EDE320bfB26659De57Ab713Db108E4c0C69Dc4	Operational account for KOANT contract actions; receives SwapBack ETH.
Founder Wallet 1	0xee8c0F95E0750846265940BE659334FBBdEaEaC5	1.5% initial allocation
Founder Wallet 2	0xD8e706Bcc722800895481811dBfB77397cD690ab	1.5% initial allocation
TeamVault	0x7Ee8A6D61affF77261b152Dd0fe4AB1eAAB8450d	3.9% allocation; unlock 2027-11-11 00:00:00 UTC; beneficiary Treasury
LPLocker	0x5d9152a4F5B134cdd666253D443d259cdecA125c	LP lock; unlock 2069-09-06 00:00:00 UTC; beneficiary Genesis Safe

Trading Mechanics & Launch-State Taxes

Launch-state rules transition to permanent zero-tax operation.

Rule	Value	Meaning
Max Buy	6,976,855,600 KOANT	1.724% of total supply
Max Wallet	6,976,855,600 KOANT	1.724% of total supply
Wallet-to-wallet transfer tax	0%	Max-wallet rule still applies to ordinary recipients
Trading enablement	One-time action by KOANT Operations	No disableTrading path
Pair initialization	One-time	Official Pair is set once

Launch-state tax transitions

State	Tax	Notes
Buy #1 through Buy #69	1% buy tax	Buy count increases on qualifying buys
Buy #70 and onward	0% buy tax	Buy tax terminates
Sell while buyCount < 404	50% sell tax	Launch-state sell tax
After completion of Buy #404	0% sell tax forever	Permanent final sell-tax state
Wallet-to-wallet transfer	0%	Not treated as a buy or sell
Genesis LP setup	0%	Setup path; not treated as public trading

Permanent final state
The 1% buy tax and 50% sell tax are temporary launch-state mechanics. The permanent final state is 0% buy tax and 0% sell tax.

SwapBack

Accumulated fee KOANT is swapped to ETH during the sell path and the resulting ETH is sent to KOANT Operations.

The design does not include SwapAndLiquify, a separate dev-wallet split or a separate marketing-wallet split.

08 / KOANTUM

Smart-Contract Design Principles

KOANTUM uses limited mutable authority and one-way setup actions.

Design area	Rule
Supply	Fixed at deployment; no public post-deployment mint function
Freeze / blacklist	None
Proxy / upgrade	None
Trading	Starts disabled; enabled once by KOANT Operations; no disable path
Pair	Initialized once; no replacement setter after initialization
Tax destination	Fee KOANT is swapped to ETH and directed to KOANT Operations
Team lock	TeamVault releases its full balance after the unlock condition
LP lock	LPLocker releases its full LP balance to the Genesis Safe after the unlock condition

Transparency & Security

Public information

- KOANT token contract address and fixed supply.
- KOANT Operations, Treasury, Founder Wallet 1, Founder Wallet 2, TeamVault and LPLocker addresses.
- Allocation percentages and token amounts.
- TeamVault and LPLocker unlock timestamps and beneficiary roles.
- Trading rules, launch-state tax transitions, max-buy/max-wallet limits and reference DEX infrastructure.
- Official website, social channels and public source/document repositories.

Security-sensitive information

- Private keys and seed phrases.
- Private member/security information.
- Sensitive internal signing, infrastructure and operational security details.

Official Identity & Channels

The official website is the canonical public identity hub for KOANTUM.

Risks & Disclaimers

KOANTUM is a meme and internet-culture project involving a crypto asset. Crypto assets are volatile and may lose substantial or all value. Liquidity, market price, network conditions, smart-contract interactions, third-party interfaces and user custody each introduce risk.

Nothing in the KOANTUM website, Dr Koantstein character content, this whitepaper or official social content is financial, investment, legal, accounting or tax advice. Nothing should be interpreted as a guarantee of profit, price, liquidity, listing, future adoption or market outcome.

Users are responsible for verifying contract addresses, links and transaction details through official sources and on-chain records before interacting. Never share a seed phrase or private key with anyone claiming to represent KOANTUM.
